

CONFIDENTIAL OFFERING PROSPECTUS

Private Placement Memorandum (Institutional FinTech Edition)

ATLAS TRAVEL CLUB LLC • CONFIDENTIAL • PRE-SEED ROUND (\$75K / \$1.75M CAP)

1. EXECUTIVE SUMMARY & ASYMMETRIC THESIS

ATLAS Travel Club LLC ("ATLAS" or the "Company") is an asset-light, closed-loop private travel clearinghouse and financial technology platform organized as a Manager-Managed Limited Liability Company under the laws of Delaware and Wyoming. The Company is built specifically for affluent vacationers, digital executives, and high-frequency business travelers. By operating as a password-protected, authenticated private membership network, ATLAS operates under established statutory exemptions under the US Sherman Antitrust Act (15 U.S.C. § 1) and the European Union Digital Markets Act (Regulation EU 2022/1925 / EC Case AT.40153). These legal precedents establish that public Online Travel Agency (OTA) "Rate Parity" restrictions do NOT apply to closed buyer syndicates.

ATLAS procures institutional room allotments directly from global B2B bedbanks (Hotelbeds, WebBeds, Travco) and airline New Distribution Capability (NDC) feeds at raw wholesale net clearing costs, passing 100% of the discount directly to subscribers at 0% retail markup. The Company monetizes through four high-margin recurring engines: high-margin annual software subscriptions (96% gross margin), merchant card interchange (1.85% on luxury travel volume), a consortium discount on airline performance fees (30% share of savings), and institutional FX spreads (45 bps). Securities offered in this round are YC Post-Money SAFEs for LLCs at a \$1,750,000 valuation cap, with corporate conversion

3. USE OF PROCEEDS (\$75,000 BUDGET ALLOCATION)

ATLAS operates on modern, asset-light API protocols (RateHawk B2B, Duffel NDC, Stripe Issuing) that settle bookings synchronously via real-time card authorization at the moment of reservation. This architecture requires \$0 in locked supplier deposits or legacy airline IATA bonds. Unlike legacy travel agencies that lock up \$50k–\$100k in non-productive bank guarantees and hotel room blocks, ATLAS operates a pure software model with zero inventory liability.
